

VISHWAS THUMMAR

Cybersecurity Analyst | SOC Operations | VAPT | Penetration Tester

Ph: +91 7874557954 | Email: vishwasthummar@gmail.com | LinkedIn: [linkedin.com/in/vishwasthummar](https://www.linkedin.com/in/vishwasthummar) | Location: Ahmedabad, Gujarat, India

Objective

Results-driven Cybersecurity Analyst and Software Engineer with 3+ years of hands-on software development experience and a strong pivot toward SOC operations, threat detection, and incident response. Proficient in SIEM log analysis, VAPT, network security, and MITRE ATT&CK frameworks. Seeking a Cybersecurity Analyst / SOC Analyst / Security Engineer role at a top-tier product company where I can apply my dual expertise in software engineering and cybersecurity to defend complex systems at scale. Open to on-site, remote, and international opportunities.

Education

Bachelor of Computer Applications (BCA)

Gujarat University, Ahmedabad, Gujarat

April 2020 – April 2023

Computer Science

- Relevant coursework: Data Structures, Operating Systems, Computer Networks, Database Management Systems, Web Technologies, Information Security.

Skills

Cybersecurity	Vulnerability Assessment & Penetration Testing (VAPT); Web Application Security Testing – OWASP Top 10 (Basic); Security Testing Tools: Burp Suite, Nmap; SIEM & Log Analysis (Basic); Threat Detection & Incident Response (Introductory); MITRE ATT&CK Framework (Conceptual)
Networking & OS	Networking Fundamentals: TCP/IP, DNS, HTTP/HTTPS; Operating Systems: Linux (Ubuntu, Kali), Windows; Packet Analysis: Wireshark (Basic); Network Scanning & Enumeration: Nmap; Metasploit Framework (Beginner)
Programming	PHP, Python (scripting for automation), Bash, SQL, JavaScript
Frameworks & Tools	Laravel, WordPress, MySQL, Git, GitHub, REST API, Postman, VS Code
Cloud & DevOps	Basic AWS concepts, Linux server administration, CRON jobs, SSH
Soft Skills	Problem Solving, Critical Thinking, Analytical Mindset, Attention to Detail, Cross-functional Collaboration, Technical Documentation, Effective Communication, Adaptability, Time Management, Self-motivated Learner, Team Player, Ownership & Accountability

Experience

Junior Software Engineer

Serenetic Software Pvt Ltd

March 2024 – May 2025

Ahmedabad, Gujarat, India

- Designed and optimized complex MySQL queries improving database query performance, contributing to faster application response times.
- Developed and maintained backend systems using core PHP and Laravel, focusing on RESTful API integration and scalable architecture.
- Collaborated in an Agile team to build and ship production-grade web applications for clients across multiple domains.
- Implemented input validation and secure coding practices to reduce common OWASP vulnerabilities (SQLi, XSS) in internal applications.
- Participated in code reviews, identifying logic flaws and security anti-patterns, resulting in improved code quality and reduced bug count.

Junior Laravel Developer

iGex Solutions

February 2023 – February 2024

Ahmedabad, Gujarat, India

- Contributed to a School Management System using Laravel and Metronic JS, delivering role-based access control (RBAC) features for 500+ users.
- Developed custom WordPress plugins and performed theme customization to meet client-specific requirements and enhance site security.
- Integrated third-party APIs and payment gateways, ensuring secure data transmission via HTTPS and token-based authentication.
- Reduced average page load time by 20% through query optimization and caching strategies in Laravel projects.

- Learned and applied core Laravel concepts including routing, Blade templates, Eloquent ORM, middleware, and migrations on live projects.
- Assisted senior developers in deploying applications to Linux-based servers, gaining exposure to SSH, file permissions, and server-side debugging.
- Built feature modules under mentorship, consistently meeting sprint deadlines in a fast-paced development environment.

Projects

SOC Home Lab – Threat Detection & SIEM Setup

Personal Project

- Built a home SOC lab using VirtualBox with Kali Linux and Windows VMs; deployed an open-source SIEM (Wazuh/Splunk) to ingest and analyze system logs.
- Simulated common attack scenarios (brute force, privilege escalation) and created detection rules and alert dashboards to identify indicators of compromise.
- Mapped simulated attacks to MITRE ATT&CK techniques (T1110, T1078) for threat categorization and response planning.

Network Vulnerability Scanner – Python Automation

Personal Project

- Developed a Python-based tool using the `socket` and `scapy` libraries to automate port scanning, OS fingerprinting, and service enumeration on local networks.
- Generated structured vulnerability reports, prioritizing findings by CVSS severity, to replicate real-world penetration testing workflows.

School Management System – Laravel & Metronic JS

iGex Solutions

- Contributed to a multi-role SaaS-style ERP system managing student records, attendance, and fee collection for 500+ end users.
- Implemented secure authentication flows and RBAC to ensure data segregation between Admin, Teacher, and Student roles.

Achievements & Certifications

- **Deloitte Australia – Cyber Job Simulation (Forage):** Completed a real-world cybersecurity simulation covering threat analysis, security advisory, and incident documentation workflows used by Deloitte's cyber team.
- **Mastercard – Cybersecurity Job Simulation (Forage):** Successfully identified and analyzed phishing threats, developed security awareness content, and presented mitigation strategies in a simulated enterprise environment.
- **3+ Years of Professional Software Development:** Delivered production-ready PHP/Laravel applications across diverse client projects, demonstrating strong engineering fundamentals applicable to secure software design.
- **Secure Coding Champion (Internal):** Proactively identified and remediated OWASP Top 10 vulnerabilities (SQL Injection, XSS, Broken Authentication) in legacy codebases at Serenetic Software Pvt Ltd.
- **Self-driven VAPT & Blue Team Learning:** Actively practicing on platforms such as TryHackMe and Hack The Box to build practical penetration testing and threat hunting skills.
